Release Notes v3.2

Change Requests and Enhancements	
Login – Updated Privacy Policy	A legal requirement has been added for the need to accept the updated privacy policy and terms of use for all users.
Authorised Transfers – Rejection Alert	Customers will now be alerted of Authorised Transfer movements that have timed out and rejected to facilitate action.
Fixes	
Authorised Transfers – Data Mismatch	In some instances, the reason code was not consistent when removing outstanding Authorise Transfers from the Authorise Transfer dashboard. This has now been resolved.
Review/Modify – Excel Download	Equipment Quantities and Dates were not in the correct format when the Review/Modify Export was downloaded. This has now been resolved.
Review/Modify – Contact Details	Errors were occurring when trying to view the contact details of trading partners from Review/Modify. This has now been resolved.
Issues/Returns – Printing	Issues/Returns were not able to be printed when the user had Japanese as the selected language. This has now been resolved.
Issues/Returns – Consumables	In some instances, there were issues with consumable quantities overwriting hire materials, when attempting to order. This has now been resolved.
Issues/Returns – Data Duplication	In some instances, driver comments were duplicated multiple times when a customer copied an order to multiple future dates. This has now been resolved.
Reporting – Stock Balance Report – Date Format	Dates were not in the correct format when the Stock Balance report was extracted. This has now been resolved.
Reporting – Transaction Activity Report	In some instances, the Transaction Activity Report was becoming unresponsive when a user applied advance searches. This has now been resolved.
Authorised Transfers – Multiple Equipment Lines	In some instances, there were issues with the way multiple equipment lines were processed in the Authorise Transfers module. This has now been resolved.
Translations – Chinese Headings	There was an issue with the bulk transfer excel template with column headers not appearing in Chinese when expected. This has now been resolved.
